WORK EXPERIENCE

Software Engineer, Full Stack & AI Next.js, Node.js, TypeScript, AWS, Python, MongoDB	Apr 2025 - Present
AI20Labs	Remote

- Spearheaded full-stack development of a production-grade AI-powered SaaS platform, owning end-to-end delivery of critical features across frontend, backend, deployment, and DevOps.
- Built the entire frontend architecture from scratch using Next.js, including dashboard, authentication flows, and AI assistant.
- Developed and integrated backend APIs for user auth, agent interactions, and read receipts; implemented AI email assistant and analytics features end to end.
- Managed deployments via AWS (ECR, EC2, CloudWatch), handled DNS with Cloudflare, and configured alerts to Slack for container health monitoring.
- Authored detailed JIRA tasks and documentation; established coding standards and created onboarding docs for faster team ramp-up.
- Conducted code reviews across 3 repositories and mentored 2 interns, guiding task execution and evaluating performance.
- Collaborated with PMs and resolved client issues via email and live calls.

Software Engineer, Full Stack Next.js, Node.js, MongoDB	Oct 2024 - June
Colombo AI	Remote

- Architected the Wallet microservice in Flask to fetch Google AdSense data and distribute revenue based on impressions and views.
- Improved Feed performance with infinite scrolling and MongoDB indexing, reducing load times by 60%
- Built secure Passkey authentication and refactored legacy modules, reducing technical debt by 40%
- Automated CI/CD with GitHub Actions and Docker, cutting deployment time from 1 hour to 5 minutes with zero downtime.
